

Igor Muzyka

Software Engineer

Summary

7+ years of iOS Development

30+ iOS Applications

2 macOS Applications

3 Backend API's

Couple of CLI applications

A bunch of Open Source libraries

About me

Hi, I'm an iOS developer with deep experience with Swift and Objective-C, gathered while developing lots of iOS, a couple of macOS apps, few backend API's and even working with hardware & software for smart home appliance. A little bit of soldering won't scare me.

I love developing applications and see them up and running.
Writing clean and readable code is my second nature.

My best skill is my imagination - give me a problem, and I can come up with a solution or two or a dozen.

Imagination as also what makes me fall in love with software development, as there is always something to improve or automate and a way to make things better.

I'm always going down the rabbit hole and go the extra mile.

I always try to figure out business goals from clients and satisfy them first.

I strive to perfect my skills all the time, learn constantly, and research in-depth.

I'm passionate about software development and do a lot of it in my free time.

In the last three years, I've broadened my skills in development to applications on macOS and Linux.

Researching and developing brings me joy and relaxation, as well as some anxiety at times.

I especially like working on tools for developers, which would improve their work experience or automate things.

I spend my free time by playing various musical instruments, reading books, writing code, crafting items, or taking photographs.

Skills

Platforms

-  iOS & macOS
-  Linux

Programming languages

- ✓ Swift
- ✓ Objective-C
- ✓ JavaScript
- ✓ Bash

Languages

-  Ukrainian native
-  Russian native
-  English upper intermediate

Experience

Smoozly

-  iOS Developer
-  Full-time

- iOS App development and support
 - Performance tweaking
 - Bugfix
 - New editor functionality

 November 2019 - March 2020

Self-employed

-  iOS/macOS/linux Developer
-  Full-time

- iOS App development & support
- macOS App development & support
- Backend API development & support
- Detailed project estimation

 March 2019 - September 2019

Compote

-  Backend Engineer & Co-founder
-  Part-time

- Deployment & Infrastructure setup and maintenance
- Backend API development
- Web Frontend development

 May 2019 - Now

Ciklum

-  Senior iOS Developer
-  Full-time

- iOS App development and support
- Researching, learning & sharing:
 - Training object detection/recognition machine learning models
 - Continuous Integration
 - Coding standards
 - Developer Onboarding
 - Developer Playbook
 - Behaviour Driven Development
 - Test Driven Development
- Project estimation
 - Ballpark
 - Detailed

 February 2018 - February 2019

Self-employed

 iOS/macOS Developer
 Full-time

- iOS App development & support
- macOS App development & support
- Backend API development & support

 April 2017 - February 2018

Yalantis

 iOS Developer
 Full-time

- iOS App development & support
- Open Source iOS component development
- Detailed project estimation
- Backend API development & support
- Slack bot development

 August 2013 - September 2017

Education

Ruby

 Ruby
 Yalantis
 April 2017 - June 2017

Calculus

 Calculus
 Coursera (OSU)
 June 2016 - September 2016

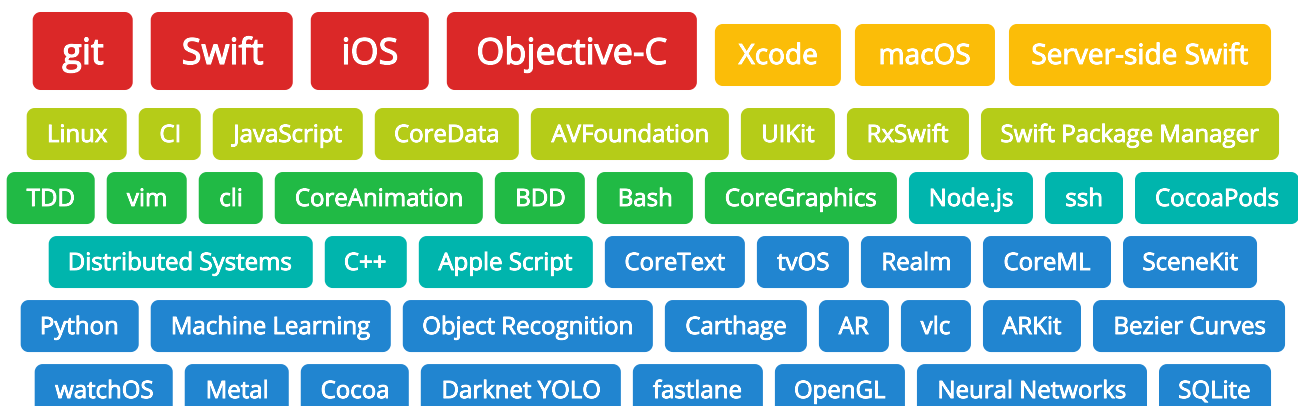

Scala

 Scala
 Coursera (EPFL)
 April 2016 - August 2016

Computer Science

 Bachelor's degree
 University of Technology, Ukraine
 September 2010 - May 2013

≡ Tech Stack

iOS Apps I worked on (and can publicly share)

Smoozly

Animated templates for stories and posts

Brilliant Move

On demand delivery app for delivery guys and clients.

Bobber

Organize and manage meetings with friends.

E-Contact

iOS application for a pre-existing regional government service.

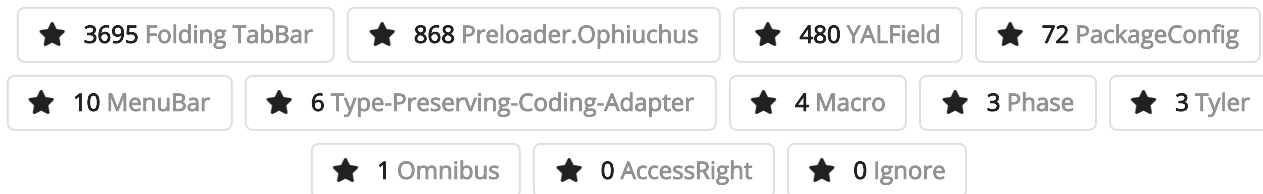

Life Buzz

News resource app.

AA Companion

12 steps companion app.

🔄 Open Source contributions

Other development experiences
